

Evidence Pack – OBDScribe History & Reporting Features (v0.1)

Feature Area: Report History, Filters, Clone, PDF Export, CSV Export

Repo: kevin-novanta/obdscribe

Date: 2025-11-30

Author: Kevin Evans (+ ChatGPT-assisted)

This PDF summarizes the implementation and manual verification of the History feature set in OBDScribe. For full details, including code references and screenshot filenames, see the markdown version stored in `docs/evidence/evidence-00003-11-30-25-history/obdscribe_history_feature_evidence_v0.1.md`.

Key capabilities covered:

- Report history table scoped to the current shop and user.
- Filtering by make, model, OBD code, complaint text, and date range.
- Viewing report detail pages with full AI output.
- Cloning reports into the New Report flow.
- Downloading single-report PDFs.
- Exporting filtered history as CSV.

This PDF is intended for quick review and portfolio / stakeholder sharing. Refer to the markdown file and repository commits for the authoritative technical record.
